**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A cartridge for use with a digital printing device, the cartridge including:

a casing for housing print media and a supply of ink, the casing being configured to operatively engage the supply of ink with the printing device with which the cartridge is to be used; and,

a transport assembly arranged in the casing to engage with a powered gear provided on the printing device with which the cartridge is to be used, the transport assembly being configured to be driven by the powered gear thereby to drive the print media from the casing.

2. (Original) A cartridge according to claim 1, the casing including a first portion for housing the print media and a second portion for housing the supply of ink.

3. (Original) A cartridge according to claim 1, the cartridge including a print media exit, the transport assembly being disposed upon operation to pick up and drive a sheet of said print media through said exit.

4. (Original) A cartridge according to claim 3 wherein said transport assembly includes:

a drive shaft;  
a drive gear coupled to the drive shaft; and,  
pick up rollers rigidly connected with said drive shaft.

5. (Original) A cartridge according to claim 4 wherein the drive gear is adapted to engage a powered corresponding gear provided on the printing device with which the cartridge is to be used.

6. (Original) A cartridge according to claim 5 wherein the drive gear is able to engage a powered corresponding gear provided on the printing device by means of an aperture provided on said casing.

7. (Previously Presented) A cartridge according to claim 1 which includes a shielding means arranged adjacent an exit opening in the casing for assisting in the supply of print media to said printing device.
8. (Original) A cartridge according to claim 1 the cartridge including a casing portion for housing the supply of ink, the casing including distinct chambers for storing a supply of different colored inks, each ink storage chamber having a corresponding ink outlet closed with a pierceable seal.
9. (Currently Amended) A cartridge device according to claim 8 wherein each ink outlet is in the form of a nozzle adapted to connect with a corresponding ink connection means provided on the printed-printing device with which the cartridge is to be used.
10. (Original) A cartridge according to claim 9 wherein the ink storage portion is defined at least in part by a collapsible membrane.
11. (Original) A cartridge according to claim 10 wherein the casing includes a first print media storage molding, a second ink storage molding and an intermediate molding that serves to complete and enclose said print media and ink storage moldings, whilst simultaneously interconnecting the two.
